
HIWI JOB OFFER

Biochemie-Zentrum der Universität Heidelberg

Ruprecht-Karls-Universität

16th March 2018

Our research group, located in the BZH, is mainly interested in the mechanisms of neuro-vascular development in mice. We are looking for a motivated HIWI student to help with basic experimental techniques such as mouse genotyping, cell culture and histology.

The successful candidate should have the following skills:

- Interest in research
- Fluent English
- Good knowledge on basic biology and biochemistry processes

Candidates should send their application by email to:
