**Postdoctoral Position
@German Cancer Research Center, Heidelberg**

We are seeking for highly motivated postdoctoral candidate who is willing to work on stem cells and cancer in the central nervous system. The Liu Lab is currently focusing on finding novel therapeutic target in human glioblastoma. We apply a wide range of cutting-edge technics (Mouse models, single cell technology, single molecule FISH, human organoid etc). The project will involve using established human glioma organoid system study cellular heterogeneity and treatment response, with the aim to find novel targeting strategy and translate that into clinical practice.

Specific Requirements:

- Ph.D work related to in genetics, cancer biology, organoid technology or neurobiology are preferred.

Work Place: Heidelberg

Start Date January 2021

To apply, please send your CV with list of publications, a description of your research interests, and the addresses of 2-3 references to :
